3

Just snap the Modlock in Place!

4

Cut at 2 "V" Notches, and remove the pieces!

## Eiffel Tower Phone

Authentically styled reproduction of the famous 'Eiffel Tower' phone from the turn of the century. Some say it was the most beautiful phone ever made!

Since it's an open design and you can actually see all of the components of the phone, it was sometimes called the 'Skeleton' Phone. The 'Eiffel Tower' name comes from its unique shape, resembling the famous French tower. The mechanical bells ring when the crank is turned! Electronic ringer on incoming calls. Heavy die cast metal handset and body with ornate detailing. Touch-tone dialing, redial and ringer on/off switch. This is a great phone, and a great conversation piece!

#MI S9C

**Everybody Loves This Phone! \$98.00**

## Out-On-Job Tags

1. Clip an Out-On-Job Tag on your tool, while it's in your case.
2. When you take the tool out of your case, remove the Tag.
3. Place the Tag on the handle of your case, so you'll remember to retrieve your tool, and put it back in the case...

**BEFORE you leave the job!**

## STOP FORGETTING YOUR TOOLS ON THE JOB!

We can make your Training or Sales Video in our In-House Studio! Our Unique Linear Production System will Save You THOUSANDS!

We use a unique Time Code Editing Technique to produce a finished video... **In the Studio!** A one hour video normally takes 2 days to shoot.

Our editor simply adds the titles and music to the beginning and end, and you have a finished video within days, instead of weeks or months!

You save both time and money by **not** paying for hours and days of editing. A "How-To" Video is available, which shows you exactly how it will be done when you get into the studio.

We're also looking for telecom Experts to do Training Videos for us to sell! We handle production expenses, and pay a monthly royalty on each tape sold.
