

NT Digital Option Manager™

for Meridian & Norstar Digital Sets

Only \$219.95!
with 24VDC Power Cube

Regular Model: #MI S9R • Constant Audio Model: #MI S9Q

Install at Phone, KSU or bridged anywhere on the pair!

Does **NOT** have to be connected in series!

Activate Relay Contacts (a dry closure) by:

- Off-Hook Indicator (Busy Light)
- Ringing Indicator
- Message Waiting Light
- Intercom Voice Call / Page Indicator

- Different Flash Rate (Cadence) for Each Option!

Choose any two options by dip switch!

Silent Observation for Digital Sets!

NOTE:

2 Models... Same Price!

1. Regular Version shuts off the audio when the phone is hung up between calls, which allows VOX operated recorders to function properly. Audio is supplied after one call is made.

2. Constant Audio Version allows real time audio for service observation as soon as Option Manager is plugged in. This means that you will also hear Background Music (if equipped) between calls, so it won't work with VOX recorders.

Monitor and / or Record

Use any Voice Activated (VOX) Recorder

Use a Jack Panel to Select which Employee you want to **Record** or **Monitor**

NEW!

NT Digital Option Manager™

To Mount Multiple Option Managers™:

16 Slot Cabinet w/Power #MI S9S \$ 1,095.00
Option Manager™ Card (ea.) #MI S9T \$ 179.95

Great for Multiple Line Call Loggers!

For Recording:

- Police Departments (911)
- Stock Brokers • Salesmen
- Insurance Agents

For Alerting:

- Stop walking up and interrupting people wearing headsets!
- Activate a light or buzzer when there's a message, or your phone is ringing!
- Loud paging on intercom calls!

Switch who you are monitoring at any time - you won't disturb calls in progress!

One Option Manager™ can monitor many employees!

Locate Jack Panel in Phone Room, or the Supervisor's office - within 100 feet of KSU.
