Telephone Handset Audio Tap (THAT-2)

Ask us about using THAT-2 on Talk Shows!

If you can get to a modular handset cord, this unit will send or receive the **best quality audio** you can get on a phone line (300 to 3000 hz).

This is the unit used by professionals to record **voice prompts** on Voice Mail and IVR systems.

It will allow you to record or play back high quality audio from **PC Sound Cards**

THAT-2 is used by **Radio and TV Crews** as a telephone interface for digital telephone systems, both in the studio and in the field.

- Works with analog, digital, PBX, and ISDN telephones
- Both RCA and XLR line in & out connectors are well labeled
- Switch selects between carbon, dynamic, or electret handset types - covers 99% of the phones out there!
- 2 Volume Controls (In & Out), allow for highest quality audio
- No battery or AC adapter needed
- Durable diecast aluminum construction
- FCC approved • *Not for use on "Dial in Handset" phones*

- Radio Station Phone Patch
- Record Prompts on Voice Mail & IVR
- Record From & To PC Sound Card

INLINE PATCH HYBRID COUPLER

Lets you record **BOTH Sides** of a Conversation, or **SPLIT** the audio to hear the **OUTSIDE** caller, or the **INSIDE** caller!

\$264.95

#KI T9C

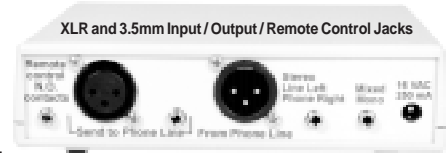

Connects inline between Analog Phone Line and Telephone (not handset)

STEREO Output jack allows you to listen to inside party on Right Channel, and Outside Party on Left (20db separation)!

Records great off cordless phones!

- Works **GREAT** with PC Sound Cards
- Inject audio down the line in addition to, or instead of the phone's audio! (That's why the host sounds so good on Radio and TV call-in shows)
- Off Hook switch allows you to go on line without the need for a phone, and you can even go off hook remotely with a contact closure.
- Provides talk battery so you can record from a phone with **NO** phone line!
- Complete control of all volume levels and mix from front panel controls.
- For Telecom Demo or Teleconference presentations, you can use a cordless telephone. This feature lets you walk around the room and talk over the telephone while everyone listens. The audience can try your IVR application without annoying feedback.
- Does not disrupt Caller ID.

- Are you sending too little cable out to your jobs?
- Do you make expensive trips back for more cable?

Scale Master Digital Plan Measure

Now you can accurately calculate the amount of wire you need on a job... No matter what the plans look like or what size they are!

Just roll it around the plan... and order the wire!

Copy Paper, Blue Print, Fax or...

If there's a measurement printed on the plan the Scale Master will do the job in seconds (no scale needed)!
