

# MULTI-LINE ANSWERING DEVICES

## Answer More Than One Line... With ONLY One Answering Machine!

### Automatic 2 Line Answering Machine Switch

Limited Quantity  
Automatically connects to the line that's ringing! **\$24.95** #SWI 8A  
*Also works with Caller-ID boxes!  
Make one box work on 2 lines!*

### Automatic 3 or 4 Line Answering Machine Switch with AUTOMATIC BUSY OUT OF HUNTING LINES!

2 Models Available:

1. Answer Any of 3 Lines - BUSY the Other Two
2. Answer the FIRST of 4 Lines - BUSY the Other Three

**3 LINE BOX: \$114.95** • **4 LINE BOX: \$79.95**  
#SWI 9C #SWI 9D

**3 Line Box also good for 3 Line Caller ID!**

By busying out other lines in hunt groups or connected to an answering machine, callers after the first one will get a **BUSY SIGNAL** instead of open ringing (no answer).

This is the **CORRECT** solution to one answering machine for multiple lines. The only other choices are: Order a Break Hunt Switch from the phone company (a private channel that signals the CO to stop hunting). Use Call Forwarding to a non-hunting line. Busy out the lines manually (but you couldn't use them for outgoing calls). Get a multi-line voice mail system.

### If You Repair Consumer Phones, You MUST Have This UPDATED Book!

**NEW 4th EDITION!**
