

Our Current Toshiba Parts:

Toshiba EKT6500 & DKT2000 Series Hookswitch.....	\$ 2.29
NEW! In 50 Quantity.....	\$ 1.99
Toshiba 5/6000 Series Hookswitch Replacement.....	\$ 3.99
In 50 Quantity.....	\$ 2.99

>Note: The original switch has a clear plastic cover on which the white plastic lever hinges. If someone uses their finger to hang up the phone, they sometimes crack the clear plastic cover, and the hookswitch no longer operates properly. Our replacement switch is super strong... IT WILL NOT BREAK!
 Toshiba 24V CO Line Card Relay - for MCOU
 Causes Low Volume & Cut Outs..... \$ 5.99
 Toshiba 24V CO Line Card Relay - 1PDT for HCOU Card..... \$ 4.99
 Toshiba 600/9600 (600/9.6) Power Transformer for Phones..... \$ 8.99
 In 100 Quantity..... \$ 6.99

>IMPORTANT Note: This is the power transformer in all of the Toshiba phones. In the newer phones (5/6000 and 6500s), they made the transformer smaller and smaller. This causes the transformer to burn up sooner, rather than later. Our transformers are the original large size, but will fit in all the phones. This is the number one cause of dead Toshiba phones! To diagnose, simply unplug the phone and use an ohm meter across each of the transformer pins. If any are open, or there seems to be a short (sometimes you can see burn marks on the outside of the transformer), pop a new transformer in and it should be fixed! Our \$44.95 One Handed Solder / Desolder Unit makes it a breeze!<

Toshiba Handsets: Page 13

 Both ends bent in same direction, so you know which way your hook is facing!
 • 9" - \$3.99 #T002L • 18" - \$4.99 #T002M

• Spring Steel •
FISH WIRE 36" - \$5.25 • 72" - \$9.95
 #T002I #T002J

GLOW RODS™ WIRE PUSHERS

• Fish Thru Cinder Blocks and Voids **EASILY!**
 • Fluorescent green fiberglass rods 3 ft. #HND6A: **\$5.45**
 • Easy to see with light shined on them 4 ft. #HND6B: **\$6.99**
 • Less than 1/4" in diameter 6 ft. #HND6C: **\$9.45**
 • Flexible, and holds memory back to straight after flexed
 • Hole at one end for pushing (not recommended for pulling)
Work from ONE Side! To push wire, push one or two conductors thru the round side of the hole, bend over on flat side of hole. Push wire and rod up or down drilled hole and jab rod while holding wire. Wire disconnects easily and stays there while you pull the rod back! **Don't go out without one!**

NEW: White Spudger w/ Clip & Cap: #T001L **\$2.39**
\$3.99 **Double Ended** One Straight Wire & One Hooked for Rotary Dials #T002D

SPUDGER: "You ain't a phone man without this pick tool!"
