

4 Line Call Accounting AND Caller ID Box for \$369.95!

See Page 63 for More Info!

Mention this catalog and get your first unit for **\$349.95!**

Actually records digits dialed on INBOUND calls! This means you can match the Caller ID number with the mailbox the caller dialed. If he hangs up or doesn't leave a message, you can still call him back and know what he wanted!

30 Day Moneyback Guarantee!

I can't believe this thing! It's like a Swiss Army Knife... it will record whatever information your customer needs to know about his phone lines. ***A real problem solver!***

Here's what it will do (turn any of these On or Off):

- See Inbound Caller ID (with name if delivered)
- See which Distinctive Ring Line came in - GREAT for **ad response!**
- See any DTMF digits dialed **ON INBOUND CALLS...** use to verify what mailbox was dialed **along with** the Caller ID number!
- See how long the phone rang • Use in series **or** bridged with lines
- See Outbound Calls - records 25 digits (like beeper #s) including * and #
- See the time, date and duration of all calls... IN & OUT
- Detailed real time data for On Hook, Off Hook, Flash & Ring Signal
- Get information before, after, or before **and** after each call
- **Block or Allow** up to 50 phone numbers from ringing through
- First ring suppression prevents calls from being answered too soon
- Comprehensive (very detailed) or simple data format

Applications:

- **Pop up customer records on screen before answering call** (Allows for a few moments to review client's information before responding)
- **Build prospect mailing lists for Call-ins** (Criss-cross phone numbers with names and address)
- **Call back customers that hang up during busy times** (Unit logs every call whether answered or not)
- **Save time taking orders** (Bring up customer records and save precious seconds during peak hours)
- **Automatically bill clients** (Route date, time and duration of each call directly to billing software)
- **Determine the number of telephone personnel required** (Track number of rings before calls are answered and duration of calls)
- **Determine outbound telemarketing productivity** (Calculate # of successful contacts v number of calls / total time on phone)
- **Track Interactive Voice Response (IVR selections)** (Unit reports all digits dialed during phone call)
- **Increase modem/LAN security** (Inbound hardware blocking prevents unauthorized access to sensitive data)
- **Deterring employee personal calls and unauthorized long distance usage** (Cross check outbound calls with telephone bill charges)

Buy 2 or more for only \$349.95 each, because you can connect up to ten units together to cover 40 LINES!

All the info on INBOUND and OUTBOUND calls on out ONE serial port!

Stick the serial port into a serial printer (we've also got parallel to serial converters for \$59.95 so you can use a cheap parallel printer), or into your PC to log all the calls!

Parallel to Serial Converter #SWI 8B: \$59.95

NEW! 2 Port #CI D6L: \$184.95 (Includes 250 call buffer, NO blocking)

4 Port #CI D4L: \$369.95 (2+ @ \$349.95)

8 Port #CI D6I: \$649.95 (2+ @ \$619.95)

Get your first 4 port unit at \$349.95 so you can demo it!

YES! This is how we know who you are before you tell us!

Know any REAL ESTATE COMPANIES? Prospect calls into a voice mail that describes a house they saw in the paper. Now you know the prospects phone number AND exactly what kind of house they're looking for! Call them back with their DREAM HOUSE!!!

Perfect for PUBLIC CALLING CENTERS... Have as many phones being used at one time as you need. ONE printer or PC will show you when someone starts using a phone, the number called, and the duration!

Find UNPUBLISHED NUMBERS... Send a card saying they won something. An answering machine says to enter your code number from the post card. *Now you've got their number!*

Use Whozz Calling 4 with a PC (front end) to control your phone lines...

Using the "In" & "Out" Jacks, You can Pass or Block each call depending upon:

- Incoming line
- Time of day
- Area or Exchange Code
- List of 10 or A Million Phone Numbers
- Distinctive Ring Code

NEW!
