

The Original  
**E-Z Ancor**

Self-Drilling One Piece Ancor that's  
**Strong as a Toggle!**

If you're tired of going back to rehang those wall phones, or put that jack back on the wall, here's the answer!

Lowest Prices!

**Fast & Easy Installation with a Phillips Bit!**

**NOTE:** Both have the same holding power, but **Zinc** resists backing out of the wall if you have to remove the screw.

For #6 Screws!

**World's Best! - Copper with Warning Tag**

**These Devices Solve Your Customer's Problems!**

Using these could mean getting a job over your competitor, or getting paid for a job that there was a misunderstanding on.

Stuff happens, but our Unique Telecom Products can solve a lot of those problems... and make you look like a hero!

Also take a look at our Wizard's Tool Box on Page 40, for more problem solving devices.

**DTMF Flash Generator**

#MIS1D

Dial a digit or a string of digits, and the DTMF Flash Generator opens the line for a programmable length of time!

- Always listening for Activation Digits!
- Use any combination of digits for Activation
- Install *In-Front* of a PBX or Key System, to Flash the CO Line
- Programs up to 1060ms, to allow you to hang up the line instead of flash!

**Use it if...**

- There's no button left to make a Flash Button, or *there is no Flash Button*
- Flash is blocked by Toll Restriction • The user can't figure out how to Flash
- Your Voice Mail won't do a Hook-Flash, to transfer a call on the CO line
- To make a "D" Tone hang up your Voice Mail.

**Will accept digits from either party!**

**DTMF Tone Generator**

#MIS1H

Dial a digit or a string of digits, and the DTMF Tone Generator makes any other digit(s) you need!

- Always listening for Activation Digits!
- Use any combination of digits for Activation
- Useful with NT Voice Mail, which hangs up if you program it to dial a # when sending a DTMF page (Just use the DTMF Tone Generator to make a \*\* dial a #)

**Will accept digits from either party!**

**2 NEW Problem Solvers...**

Your Choice:  
\$48.95  
3 @ \$44.95

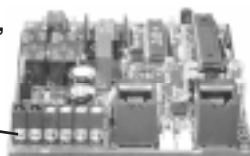

- Modular
- Line Powered • Install In-Series
- Program from Touch Tone Phone... **Even Remotely!**

**NEW!** \$79.95 • 3 @ \$74.95 #MIS1C  
**DTMF Relay**

Dial one or a string of digits, and activate a dry closure!

- 2 SPST Relays can be activated at the same time (for DPST), or independently with different codes!
- Programmable Dry Closure time, or toggle. Releases with CPC.
- Programs from DTMF Phone.
- Requires 12VDC-25ma Terminal Strip

**Useful for...** • 911 Alarm  
• Paging Zones • Message Waiting • Alarms • Remote Control
