"Real World ISDN"

2 Tape Set

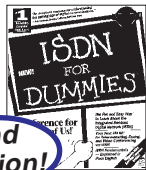

Video Conferencing

Spend 3½ Hours with Andy Kauffman, an ISDN Expert, and be able to talk knowledgeable with your customers about potential uses of ISDN in their company. You'll learn applications that will make you money NOW!

ISDN is standards based. This means that any ISDN equipment will work with any other equipment or lines (This was not the case a few years ago).

Modern modems work as fast as 53K if you're really lucky. 1 ISDN line (2 wires) can go 128K! An ISDN call can be dialed and completed anywhere in the country within 3 seconds, as opposed to 15 seconds or more with an analog line. Learn how to send data faster - now, or get left behind in the dust of others!

Good companion Book: ISDN for Dummies

After you watch our Video, books, magazine articles and tech manuals about ISDN will make a lot more sense! An excellent easy to read companion: \$24.95

2nd Edition!

Touch Tone Pad HANDSET DIALER

Permits access via DTMF signalling to beepers, voice mail, banking services, etc. from phone system Consoles or other equipment that can't provide Touch Tones.

Only \$139.95

#WAL7T

- Easily connects in series with handset and headsets or interfaces directly to Tip & Ring with the furnished adaptor kit
- Powered by 9V battery (provided) or optional 13.8 VAC adaptor • "Battery OK" LED indicator
- Adjustable Touch Tone Volume Control
- Switch selectable transmit (per handset wiring protocol)
- Console phone auxiliary handset jack compatible
- Provides DTMF across a dry pair for in-house applications

"Real World ISDN" shows you:

- What is ISDN... In English!
- Applications:
 - Provide E-mail & Web access for a whole company
 - Telecommuting - Remote Access is *HOT!*
 - LAN to LAN or Mainframe Wide Area Networking
 - ISDN Telephones for small or large offices
 - Cutting Centrex Costs *IN HALF* using ISDN
 - 1 ISDN Centrex Console covers 250 analog lines!
 - Video Conferencing, Music & Publishing
- Kinds of equipment used
- How to order ISDN lines
- How to get the resources you need to propose and order ISDN equipment... *For FREE!*
- Actual Installation of some of the most popular types of ISDN equipment - even bonding 3 BRI lines together!
- Set-up Windows Networking for Web access
- An easy and inexpensive way to test ISDN lines, WITHOUT expensive special equipment
- How to deal with the phone company when you have a problem, and what equipment they have to test your ISDN line. Learn how to use their equipment (somebody should know)!

Covers BOTH BRI & PRI!

Hey. It's just one pair. It's not that hard, but unless you have someone like Andy to show you this stuff, you won't be able to get started!

When you're done... You'll be able to consult, sell, order, install and repair ISDN equipment.

Totally NEW!
Give EVERYBODY in an office access to E-Mail & the Web using 1 ISDN Line!
We show you how to set-up Windows Networking in minutes!

30 Day Moneyback Guarantee!

Scenes from the "Real World ISDN" Training Video, with Andy Kauffman

VANDAL MARK REMOVER:

THIS STUFF IS DANGEROUS!!! Use it at your own risk! It will take anything off of anything that's not really porous. We use it to get Magic Marker off of the bottoms of telephones, off of KSU cabinets, off of House Boxes, off of 66 Blocks and even station jacks (I'm cheap, so I don't throw much of anything away!). Don't forget about our unique **66 Block Wire Remover Tool**, which makes it very quick to recover old blocks. Even if you're not cheap, it's great for when you made a mistake at the top of a row of 66 Blocks, and you need to fix a lot of blocks (Don't spray it where the punchings are, since this could change the electrical properties and give you problems you'd never find). It **EATS UP PLASTIC** immediately, so **DON'T** spray it on phones that you like! If you spray it on the phone, you can actually wipe off a layer of plastic with a paper towel. It ends up looking like the skin dripping off some Monster's face in a Horror Movie when you're done. Because it takes off a layer of plastic it takes the yellowing out of a phone, but you'd have to do a lot of buffing to get it smooth. We tried buffing in our shop, and stopped it after a day. It's real messy!

Amazing Midget Wrist Radio

\$2.98
