

# "Intro to T1"

## Training Video

Much Easier than You Think!

**NEW!**  
Now with  
Additional Testing  
Information!

Great for  
Salespeople  
Too!

One **T1** takes the place of **24** regular **CO** lines - or use a combination of **voice and data** on the same **T1**. Adding a **T1** (instead of **CO** lines) can really help you expand a system without many ports left.

If you don't know about **T1**, you can't talk to your customer about **T1**, **sell** it to him, **install** it, or **repair** it.

**The margins are still very high in T1, and the costs of the lines and equipment are dropping!** #CID3K

**Andy Kauffman** shows you everything you need to know to get started, including great equipment at great prices.

**\$159.95**, but  
mention this cat.  
for **\$30 OFF!**

**\$129.95**  
**2 3/4 HOURS**

It's time to get this video! After you watch it, you'll be able to sell, install and service **T1** - **EASILY!**

## I'm Baack... **\$74.95**

### The **ORATOR** in Black

Bridge it across the **Tip & Ring** (or just about any place), and it amplifies the line in monitor mode (high impedance).

- On / Off Volume Control
- 7' Non-Mod Line Cord

#SER7E Requires 15-18VAC

### 2012B 15-18VAC Transformer

Used on Orator and old 1A2 Speakerphones (2012A In-Stock Also) #SER7F

**\$9.95**

### Replacement 10 & 20 Button (1A2) Set **Recall Button**

**\$4.95**

10 @ \$4.49
