

These were modeled after the "Shoe Phone" in Get Smart! It eventually became the Trimline set.

DIAL-IN-HAND is what Bell Telephone Laboratories calls this new phone designed by the famed industrial designer Henry Dreyfuss. The dial arrangement, with a light for night dialing, is supposed to be easier to see and operate than the old type. New Jersey Bell Tolly is installing 250 in New Brunswick homes and business offices as a test.

## Modem Filter

- Reduces Cut-offs
- Increases Modem Connection Speed

Some modem problems are caused by spikes and noise (common mode, that you *can't* hear) on the phone line!

The Modem Filter will immediately fix these problems!
