The HANDSET "Y" ADAPTER plugs into any phone's Handset Jack.

The Handset Cord then Plugs into one of the Jacks, and either the RECORDING CORD or STRAIGHT CORD plugs into the other opening.

This STRAIGHT 7' or 14' HANDSET CORD will Connect to our HANDSET BISCUIT JACK, to Feed a Central Voice Logger.

The HANDSET BISCUIT JACK goes on the wall and is connected to a spare pair of the station cable.

That spare pair is connected to a Multi-Channel Voice Logger in the Phone Room.

This jack will ONLY accept the STRAIGHT HANDSET CORD, to prevent connection errors.

You CAN Solve Your Customer's Recording Problems!

Also Allows Use of a Service Observing (Monitoring) Unit with Digital Phones!
